

Hi,

When you bet Each Way with a bookmaker you have very little chance of making regular profits unless you consistently find big odds winners.

Why?

Because the percentages are massively tilted in the bookmakers favour and odds of around 9/1 for the win will be required to break even on the place bet, or just return a very small profit.

Gold-4 has a way round that and it is the best of all worlds.

My unique strategy ensures no losing runs and winning on two bets most of the time.

- Recommended Betting Bank: 100pts
- Recommended Staking: 1pt Win and 3pts Place
- You split your stake 25% on the win and 75% on the place.
- If you have £10 then £2.50 goes on the win and £7.50 goes on the place bet.
- A minimum odds of 1.5 is required for the place.
- If you cannot get 1.5 then put the full 4pt stake on the win only bet.

My Story

I built my own betting capital up from a start bank of £250 – it took me most of a year, but I now make over £3,000 per month from my selections.

You can do exactly the same as I did, so can anyone who follows my selections and strategy.

Just keep reinvesting your winnings each day and week, to raise your point value (stake).

How?

I want you to look at an average couple of days betting played at £25 per point:

				1.5 Odds		1pt Win	3pts Place		Notes					
Date / Time	Course	Selection	Result	Win Odds	Place Odds	Win Stake	Place Stake	Win Return	Place Return	Total Stake	Total Return	Profit (Pts)	Bet Type	
4Gold 25th April														
14:05	Yarmouth	Vitalite	1st	3.05	1.74	1	3	3.05	5.22	4	8.27	4.27	Split	
15:50	Yarmouth	Beetzebub	D	3.5	1.99	1	3	0	4	4	0	0	Split	
17:00	Yarmouth	Han Solo Berger	2nd	6.2	2.82	1	3	0	8.46	4	8.46	4.46	Split	
18:25	Wolverhampton (AW)	Aihawawi	2nd	4	2.15	1	3	0	6.45	4	6.46	2.46	Split	
											16	23.17	£179.25	
4Gold 26th April														
14:10	Ludlow	Whatsdastory	2nd	5	2.12	1	3	0	6.36	4	6.36	2.36	Split	
14:50	Catterick	Sera Dawn	1st	2.02	1.43	4	0	8.04	4	8.04	8.04	4.04	Win	
15:30	Perth	Pink Legend	1st	3.15	1.28	4	0	12.6	4	12.6	12.6	8.6	Win	
17:10	Lingfield (AW)	Sausalito	1st	2.58	1.58	1	3	2.58	4.75	4	7.32	3.32	Split	
											16	34.32	£458.00	

My Total Return minus Total Stake (Profit) was over 25pts!

At £25 per point the exact profit was £637.25.

That is for only two days of quite simple betting which does not consume any real time.

The Truth Of Actually Betting For Real – Liability Vs Profitability

What do I mean by this?

Well, if you bet in win singles only you are going to get a losing run at some point. Even at short odds.

If your average win odds are above Evens you are at some point, going to hit a losing run of up to about 10.

When you have built your betting bank up to Income Levels (where you draw a weekly or monthly profit income), it can be hard to sustain making bets of £100 or more during such a challenging run of losers. Especially as many of them will be 2nd or 3rd and only just miss out on the win!

This is what I mean by 'Liability Vs Profitability.'

Gold 4 will yield comparable returns to win only, without the headache of losing runs.

Trust me on this; when you are betting for real and the Gold 4 selection you have just staked £100 on was only just pipped at the post, but will still make you a profit because of my unique staking strategy - you will be feeling much better than if your whole stake had gone on the win!

Just check over the results above in my example.
